SUNIL KULALI

Data Analyst | Business Intelligence

Bengaluru, Karnataka | sskulali3@gmail.com | +91-7619294459 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Data Analyst with internship experience in SQL, Power BI, Excel, and Python, specializing in data cleaning, exploratory data analysis, KPI reporting, and interactive dashboards. Experienced in transforming datasets into actionable business insights, automating reporting workflows, and implementing data-quality checks. Skilled in Power BI, DAX, Power Query, Pandas, and SQL-based analysis, with additional exposure to cloud data engineering through Azure Data Factory, Databricks, and Microsoft Fabric.

TECHNICAL SKILLS

SQL & Databases: SQL (Joins, CTEs, Subqueries, Window Functions, Aggregations, Views, Stored Procedures), MySQL, PostgreSQL, SQL Server

Business Intelligence & Visualization: Power BI (DAX, Power Query, Data Modeling, KPI Dashboards), Tableau, Data Visualization

Excel & Reporting: Excel (PivotTables, XLOOKUP), Data Cleaning, Charts, Business Reporting

Python & Data Analysis: Python, Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Data Cleaning, Data Validation

Statistics & Business Analytics: Statistical Analysis, Trend Analysis, KPI Reporting, Root Cause Analysis, Customer Segmentation

Data Engineering & Cloud: ETL/ELT, Azure Data Factory, Azure Data Lake Storage, Microsoft Fabric, Databricks, PySpark

Tools & Version Control: Git, GitHub, Jupyter Notebook, Power BI Desktop, Streamlit; Scikit-learn and XGBoost (machine learning foundations)

PROFESSIONAL EXPERIENCE

Machine Learning Intern | CODE-B Solutions Pvt. Ltd., Mumbai July 2025 – October 2025

- Analyzed sales performance and customer behavior using SQL queries, views, and stored procedures to support business analysis.
- Improved dataset quality for machine learning workflows through data preprocessing, outlier treatment, and validation.
- Compared classification models (Random Forest, XGBoost, Logistic Regression) to evaluate predictive performance.
- Communicated analytical findings and project results to stakeholders in clear, business-focused formats.

Data Analyst Intern | IT Vedant, Bengaluru June 2024 – April 2025

- Analyzed 10,000+ records using SQL and Python (Pandas) to clean, validate, and explore data for business insights.
- Developed Power BI dashboards using DAX, Power Query, and data modeling to track business KPIs.
- Automated recurring data preparation and reporting workflows with Power Query to reduce manual effort.
- Implemented data-quality checks and documented reporting procedures (SOPs) to improve reporting consistency.

PROJECTS

RetailIQ – Retail Sales & Business Performance Analytics

Technologies: *SQL, Python, Pandas, Excel, Power BI, DAX*

- Analyzed retail transactions using SQL to evaluate sales trends, profitability, product performance, and regional results.
- Cleaned and validated data using Python and Pandas, handling missing values, duplicates, and inconsistent records.
- Developed an interactive Power BI dashboard with DAX measures, KPI cards, time-based trends, and product and regional comparisons.
- Automated data refresh using the Google Sheets API and documented findings to support business decisions.

Customer Churn & Retention Analysis

Technologies: *SQL, Python, Pandas, Scikit-learn, Power BI*

- Segmented customers and analyzed churn patterns using SQL and Python.
- Developed and evaluated a churn classification model, reporting performance using appropriate classification metrics.
- Built a Power BI dashboard to monitor churn trends, customer segments, and retention KPIs.

Loan Approval Prediction & Credit Risk Analysis

Technologies: *Python, Pandas, Scikit-learn, Streamlit*

- Cleaned and explored a dataset containing 45,000+ loan records, performing feature engineering and data validation.
- Compared five classification algorithms and evaluated model performance.
- Developed a Streamlit application to demonstrate loan prediction results.

Healthcare Data Lake – Cloud Data Engineering & Analytics Platform

Technologies: *Azure Data Factory, Azure Data Lake Storage, Databricks, PySpark, SQL, Power BI*

- Designed Bronze, Silver, and Gold layers to organize raw, cleansed, and analytics-ready healthcare data.
- Built ETL/ELT workflows with Azure Data Factory and PySpark with data quality checks; created curated datasets and Power BI dashboards for KPI reporting.

EDUCATION

B.E. in Computer Science and Engineering | Visvesvaraya Technological University | CGPA: 8.82/10 2020 - 2024

CERTIFICATIONS

- Master in Data Science & Analytics with AI — **I.T Vedant**
- Microsoft Certified: Fabric Data Engineer Associate (DP-700) — **Microsoft**
- Data Analytics & Visualization Job Simulation — **Accenture**
- Databases & SQL for Data Science with Python — **IBM**
- Machine Learning with Python — **IBM**
